My name is Paula. I have designed web graphics, headers, banners, logos and banner ads for many years as part of a webdesign service I had in the Netherlands for several years.

I do not do websites with content any more because my husband and I are planning to move to Turkey. That is why I decided to make the graphic design service a stand alone service. I create graphics (including templates) that are suited for on-line presentations in any size but I do not create flash graphics.

You can state your preference for me to use photos, clip art or a combination of those. Of course your company logo can be included in most cases (unless it is too detailed or to large for smaller size banners). You can also give your preference for a certain type of font; I have many in store.

Please visit webmiepgraphics.com for procedure and pricing. Please click here to see samples of different styles

EXPERIENCE

Like I said I did a lot of graphic design work as part of my web design service and I designed a lot for my own websites, websites I manage and alternative graphics for affiliate programs. I recently became the graphic designer for The Marketers Co-op. I did the logo and most of the affiliate materials. For APSense I created the logos for BrandPagePro and directory.
